

Standard Drug Formulary
November 2022

RxParadigm

Page 1 of 107

Version: 11

Update Date: 10/2022

Informational Section

The RxParadigm Standard Formulary is a list of medications that are carefully selected based on their safety profile, clinical effectiveness, and cost. This document is to serve as a guide for members and providers to understand how prescription drugs are covered under the RxParadigm Standard Formulary. It is reviewed on a regular basis and revised based on safety, clinical efficacy, cost, and availability. For this reason, the RxParadigm Standard Formulary is subject to change and all past versions will no longer be in effect.

How To Use Our Formulary

The RxParadigm Formulary is categorized by therapeutic category and then further separated by therapeutic class. There can be multiple therapeutic classes within a therapeutic category. Each drug is classified under a single therapeutic category and therapeutic class. This means one drug cannot be in two different therapeutic categories or classes.

In the example below, Anticholinergic Agents is the therapeutic category, and Antimuscarinics/antispasmodics is a therapeutic class within the category.

THERAPEUTIC CATEGORY	ANTICHOLINERGIC AGENTS
Therapeutic Class	Antimuscarinics/antispasmodics

Generic versus Brand Name

The name of the drug in column Drug Name (left) is the covered drug. In order to differentiate whether the generic drug and/or the brand drug is covered under the formulary, the generic drug will appear in all lowercase and italicized font, and the brand drug is in all uppercase letters. The generic drug will also have the brand name listed under the Reference Name column.

In the example below, *dicyclomine* is the generic drug that is covered under the RxParadigm Standard Formulary, and Atrovent HFA is the covered brand drug.

<i>generic drug</i>	<i>dicyclomine hcl 10 mg cap, 20 mg tab</i>
BRAND NAME DRUG	ASMANEX HFA

Drug Tier

Each tier represents a different cost level that the member pays for a medication. Every medication is assigned to a tier. Shown below is a quick reference table that lists the drug tiers and drug tier names. Refer to the Formulary Tiering section for additional explanation of each drug tier.

Drug Tier	Drug Tier Name
1	Generic

2	Preferred Brand
3	Non-Preferred Brand and Generic
4	Specialty – Formulary Preferred with Prior Authorization
5	Specialty – Formulary Non-Preferred with Prior Authorization
6	Specialty – Non-Formulary with Prior Authorization

Reference Name

The Reference Name is the brand equivalent of the covered generic drug. When the covered drug is a generic drug, the reference name (also the brand name) will appear in Reference Name column. In the example below, Bentyl is the reference brand name for dicyclomine, a generic drug that is covered under the RxParadigm Standard Formulary.

Drug Name	Drug Tier	Reference Name	Requirements/Limits ¹
ANTICHOLINERGIC AGENTS			
Antimuscarinics/antispasmodics			
<i>dicyclomine hcl 10 mg cap, 20 mg tab</i>	1	BENTYL	

Requirements/Limits

Any medications on the RxParadigm Formulary that must meet an established requirement(s) in order to be covered, it will be noted in the Requirements/Limits column. Shown below is a quick reference table that lists the requirements/limits and abbreviation names. Refer to the Prescription Drug Coverage Requirements and Limits section for additional explanation of each requirement and limit.

Requirements/Limits	Abbreviation
Prior Authorization	PA
Step Therapy	ST
Quantity Limit	QL

Quick Drug Lookup

To quickly look up to check if a specific drug is on the RxParadigm formulary drug list, go to the end of this document to locate the index. Once you find the drug, the page number to the right of the drug name references the location of the drug in the formulary. Both generic drug and brand drug name are in alphabetized order.

Formulary Tiering

The RxParadigm Standard Formulary is divided into six categories or tiers. Each tier represents a different cost level that the member pays for a medication. Every medication is assigned to a tier. The table below summarizes the different drug tiers, with the lowest tier (1) being the lowest cost level for the member, and the highest tier (6) being the highest cost level for the member.

Drug Tier	Drug Tier Name	Description
1	Generic	Most generic drugs listed based on drug safety, clinical efficacy and cost.
2	Preferred Brand	Selected brand drugs based on drug safety, clinical efficacy and cost. A brand-name drug that does not have a generic equivalent with preferred status will be listed here.
3	Non-Preferred Brand and Generic	Selected generic and brand drugs that are not in tiers 1 and 2 based on drug safety, clinical efficacy and cost. A brand-name drug that has a generic equivalent with non-preferred status will be listed here. Certain generic drugs listed here have a preferred and often less costly therapeutic alternative at a lower tier.
4	Specialty – Formulary Preferred with Prior Authorization	Most generic specialty drugs and preferred brand-name specialty drugs, including biosimilars, that does not have a generic equivalent will be listed here. Providers must submit a prior authorization in order for the medication to be covered under tier 4.
5	Specialty – Formulary Non-Preferred with Prior Authorization	Selected generic and non-preferred brand specialty drugs that are not in tier 4, including biosimilars. Providers must submit a prior authorization in order for the medication to be covered under tier 5. Certain generic specialty drugs listed here have a preferred and often less costly therapeutic alternative at a lower tier.
6	Specialty – Non-Formulary with Prior Authorization	Selected non-formulary brand specialty drugs that are not in tiers 4 and 5. Providers must submit a prior authorization in order for the medication to be covered under tier 6. Most specialty drugs listed here have a preferred and often less costly therapeutic alternative at a lower tier.

Specialty drugs are represented in tier 4, 5 and 6. These generic and brand drugs will have one or more of the following common attributes:

- Is used to treat complex or chronic conditions, such as cancer, rheumatoid arthritis, hemophilia, psoriasis, inflammatory bowel disease and hepatitis C;
- Is used to treat rare or orphan disease indication;
- Has unique storage and/or shipping requirements, such as refrigeration;
- Require additional patient monitoring, special administration, and/or education beyond traditional dispensing activities;
- Is a high-cost oral, injectable, inhalable, or infusible drug product.

Prescription Drug Coverage Requirements and Limits

Certain medications on the RxParadigm Standard Formulary are covered if an established requirement(s) that support safe prescribing are met. These requirements include Prior Authorization, Quantity Limits, Step Therapy, etc. Each of these criteria are further explained below.

Prior Authorization (PA) is the requirement that the member's prescribing provider obtain authorization for a prescription drug before RxParadigm will cover the drug. Review of prior authorization requests is performed promptly after the member's provider submits the request. Approval can be obtained once RxParadigm confirms the drug prescribed is medically necessary for the member to obtain the drug, and justification for use is consistent with the FDA approved indication or sufficient evidence confirms medically accepted use.

Step Therapy (ST) is the requirement that the member try certain medication(s) before "stepping up" to drugs that cost more. The drugs that the members are asked to try first are typically first-line generic drugs and sometimes lower cost brand drugs proven safe, effective and affordable. First-line drugs should be tried first because they usually provide the same health benefit as a more expensive drug and at a lower cost. RxParadigm requires prescribing providers to submit a request for step therapy exception with medically necessary justification.

Quantity Limit (QL) is where the prescription quantity covered is limited to a specific amount, generally within a specific period of time, such as 30 tablets per month. Prior authorization is required for amounts greater than the limit.
